PRODUCT DATA SHEET

FOOD MACHINERY GREASE (USFDA Approved Type H-1 Grease)

PRODUCT DESCRIPTION

Food Machinery Grease is a premium white aluminium complex grease specially developed for the lubrication of all types of machinery used in the food processing industry.

Food Machinery Grease is registered with NSF (category H-1) and also complies with USDA 1998 H1 guidelines for incidental contact with food.

Food Machinery Grease contains an advanced additive technology system and PTFE to provide outstanding extreme pressure (EP) and anti-wear (AW) performance along with protection from corrosion, oxidation and water washout. It is suitable for all plain and anti-friction bearings as well as sliding surfaces.

The state-of-the-art equipment and procedures employed to manufacture **Food Machinery Grease** engenders it with a high degree of mechanical and storage stability. It resists breakdown under high mechanical stress and not release oil in storage.

BENEFITS

- Wide range of food safe applications
- Provides long term lubrication at high temperatures, therefore extending lubrication intervals
- Reduced wear under high or shock loads
- Excellent water resistance
- Superior protection against rust and corrosion
- Strong adhesive properties
- Excellent mechanical stability
- Multi-service applications
- NSF H-1 registered
- Halal certified

Hi-Tec suggests that the equipment manufacturers' recommendations for grade, performance requirements and general operating conditions should be checked prior to use.

APPLICATION

Food Machinery Grease is recommended for use in most grease applications encountered in food processing plants. The recommended operating temperature range is from -50°C to 165°C, but can endure higher temperatures for short periods or if the lubrication frequency is increased.

Food Machinery Grease can be applied by hand or using a standard grease gun (450g cartridges). As with all greases used for the first time, check compatibility with the grease applied previously and if necessary, purge bearings prior to application. Take care not to over-lubricate and apply the quantity of grease recommended by the bearing manufacturer.
